- Appointments should be made:
 - [Online](#)
 - 617-874-8059
- Tests available to patients over 8 years old

Available COVID-19 testing technologies

Below are the tests XpresCheck currently offers. Our facilities are operated by licensed doctors, nurses, and other trained health care personnel.

- **Polymerase Chain Reaction (PCR) Test**
 - A sterile swab is inserted into the nose to take a sample. This test, also called a nasal swab test, checks to see if the active virus is in the body.
- **Rapid Nasal Swab Test**
 - Like the PCR test, a sterile swab is inserted into the nose, and the sample is checked for active COVID-19 virus. Because this test is run in the clinic, results are available in 15 minutes or less.
- **Blood Antibody Test**
 - Using a blood draw or a small prick of the finger, this test looks for markers in the blood that suggest someone may have had the virus. Called “antibodies,” these markers can tell if they’ve been exposed to COVID-19 even if they don’t have symptoms.
- Pricing:

Individual PCR Nasopharyngeal Test	\$75.00
Individual Blood Anti-body Test	\$75.00
Both tests	\$90.00 (additional test \$15.00)
Abbot Rapid ID Now test	\$200.00(self-pay/no insurance)*
Abbot Rapid ID Now plus add'l test	\$215.00 (additional test \$15.00)

*Patients will need to file a claim for reimbursement with their insurance provider. Airport Employees will receive a 20% discount on Rapid Tests.
